Management Science (MGSC) 405. Quantitative Approaches to Decision Making (Revision 7). MGSC 405 provides students with an introduction to an area of management science that is sometimes called "operations research." The objective of this course is to have you develop an appreciation of the management science approach to problem formulation and solution that is now so important in today's business and industrial sectors. The course focuses on quantitative approaches to decision making and introduces you to a variety of management science models, methods, and procedures. In this course, a greater emphasis is placed on problem modelling and the interpretation of results, and I
