The Indian higher education system is the second largest in the world in terms of enrolment, consisting of nearly 30 m students enrolled in 48,500 institutions. The private sector over the last decade has played an instrumental role in the growth of the system, with private unaided institutions accounting for almost 60% of enrolment in 2011-12. The new central government, which came into power in May 2014, is putting in place various measures to improve the employability of Indian graduates and to position India prominently on the global higher education landscape through initiatives in skills development, digitisation, and research.

Southwest Indians - Pueblo is not the name of a tribe. It is a Spanish word for village. The Pueblo People are the decedents of the Anasazi People. The Navajo and the Apache arrived in the southwest in the 1300s. They both raided the peaceful Pueblo tribes for food and other goods. Who were the Devil Dancers? Pacific Coastal Northwest Indians - What made some of the Pacific Northwest Indian tribes "rich" in ancient times? Why were woven mats so important? How did totem poles get started? What was life like in the longhouse? What were money blankets and coppers? How did the fur trade work? "The last Indian War" was fought against Native American children in the dormitories and classrooms of government boarding schools. It also includes biographical sketches of prominent and lesser-known North American Indian leaders, chiefs, explorers, and their white counterparts, descriptions of migrations, the histories of tribes and ancient languages, and a list of the meanings of tribal names. He traces the crucial contributions made by the Indians to our federal system of government, our democratic institutions, modern medicine, agriculture, architecture, and ecology, and in this astonishing, ground-breaking book takes a giant step toward recovering a true American history.
