This book is the culmination of a fifty-year project that revolutionized our view of human development and now may revolutionize our view of religion and spirituality." Martin E. P. Seligman, Ph.D., author of Authentic Happiness and Learned Optimism "At last an explanation of spirituality from an evolutionary perspective that does justice to both. With his tremendous breadth of experience and personal wisdom, George Vaillant is the perfect spiritual and scientific guide." David Sloan Wilson, author of Darwin's Cathedral "More than a scientific defense of faith, George Vaillant's book is a moving account of his own intellectual quest, through science, for a spiritual view of human evolution and experience. Clearly a labor of love and a needed antidote to recent attacks on religion. An important book." An investigation into the claims of neurotheology}, author={Demetrios N. Kyriacou}, year={2018} }. Demetrios N. Kyriacou. This article is an investigation into the field of neurotheology, a controversial field which has attracted criticism from both the scientific and religious community and which is often quite divided among its own practitioners. Regretfully, but not too unexpectedly, science has gotten entangled with ideology, as we shall see in *Spiritual Evolution: How We Are Wired for Faith, Hope, and Love*. Three Rivers Press. Related posts: I was attending a weekend with Arnie Mindell (Process Oriented Psychology) after reading his book *Dreambody* and loving it. I especially loved what he had to say about water since I practice aquatic bodywork – the shamanic/ dream-state parallels he spoke to fascinated me. When I had a chance to say this to Arnie – he made a joke back about “wet dreams”™!
