What Is a Book Chapter? Seems like a silly question, but it's actually important to establish this for the rest of the piece. A chapter is one of the main ways to divide and separate distinct ideas within a book. Modern non-fiction books always have chapters. This was not always the case. Many ancient works were not organized by chapter, and either were one long text like Beowulf, or were organized with verses, like Aristotle's Politics. This being said, there are plenty of books with 30 or 40 chapters. And some books, usually with very short chapters, can have 50+. There is not a "right" answer to this question. There is the standard convention above, but that is not some unbreakable rule, written in stone. You have to make your own decision about what works for your book. Below the most recent books and book chapters by the faculty are listed.
