Volume 11100

Proceedings of SPIE 0277-786X, V. 11100

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optomechanical Engineering 2019*, edited by Keith B. Doyle, Jonathan D. Ellis, Proceedings of SPIE Vol. 11100 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 OPTOMECHANICAL DESIGN AND OPTIMIZATION

- 11100 02 **Optomechanical design considerations for a vacuum window for optical and infrared interferometry [11100-1]**
- 11100 03 **Development of a mirror mount suitable for laboratory and OEM applications [11100-2]**
- 11100 04 **Design and test of a compound curved beam flexure with off-axis actuation for precision optical alignment [11100-3]**
- 11100 05 **Optomechanical design of a portable metrology system for measurement of precision rotary stage errors [11100-4]**
- 11100 06 **The optomechanical design for the Off-plane Grating Rocket Experiment (OGRE) [11100-5]**
- 11100 07 **Structural optimization of system WFE [11100-6]**
- 11100 08 **Global optimization using LLIMAS for the design of vibration isolation systems of high-uncertainty payloads [11100-8]**
- 11100 09 **Mirror topology optimization [11100-25]**

SESSION 2 OPTOMECHANICAL ANALYSIS

- 11100 0A **Obtaining finite element thermal loads from fluence maps and voxels [11100-9]**
- 11100 0B **Finite element modeling of a laminar flexure bending mechanism for elliptically bent hard x-ray mirror [11100-10]**

SESSION 3 OPTOMECHANICAL SYSTEMS, MECHANISMS, AND DEVICES

- 11100 0E **System engineering of complex optical systems: requirements and verification documents [11100-13]**
- 11100 0G **Anomalous behavior of Transiting Exoplanet Survey Satellite (TESS) optical assembly: root cause investigation reveals crystallization of RTV 566 at low temperatures [11100-15]**

- 11100 OH **High loading precision rotation stage design for synchrotron radiation mirror stitching measurement** [11100-16]
- 11100 OI **Using a digital still camera for shearography: preliminary experiments and observations** [11100-18]

POSTER SESSION

- 11100 OJ **Design and development of large SiC mirror for spaceborne application** [11100-19]
- 11100 OL **Conceptual and test phase of optical design of seeker in missile application** [11100-21]
- 11100 OM **Effect of beam steering method on optical system** [11100-22]
- 11100 ON **Design of dual mode seeker for millimeter wave and four-quadrant detectors in missile application** [11100-23]
- 11100 OO **Stabilization effects on seeker performance in missile application** [11100-24]
