is the container for all information about a single book volume and (optionally) the book chapters. Books may be deposited as a single book, a series, or a set, and the metadata requirements differ for each type. Please review our best practices for books before registering book content. Books are divided into three categories, each requiring slightly different metadata: Book: A “book”™ is single book (edited\_book, monograph, reference, or other) that is not part of a series or a set. The title-level metadata for the book is captured in . Book Series: Books tha
