Senate Steering Committee**

4.1.2: **A Proposal to Establish the University of Windsor Institute for Diagnostic Imaging Research**

Item for: **Approval**

Forwarded by: **Program Development Committee**

MOTION: That the proposal to establish the *University of Windsor Institute for Diagnostic Imaging Research* be approved.

Submitted by: **Dr. Roman Maev
Professor, Department of Physics
Dr. Ranjana Bird
Vice-President, Research**

See attached.

University of Windsor Institute for Diagnostic Imaging Research

Executive Summary

Introduction

The format of the proposal herein for the University of Windsor Institute for Diagnostic Imaging Research is in accordance with the requirements set out in Senate Policy I2.

The University of Windsor Institute for Diagnostic Imaging Research (the “Institute”) is a multi-disciplinary collaborative research and innovation consortium dedicated to the development of innovative diagnostic imaging technologies and products using advanced and diverse imaging techniques. The Institute will develop intellectual property that will strengthen the University’s ability to directly help diversify the region’s economic sectors and increase the general competitiveness of the local region.

The Institute will foster a multi-sectoral approach involving the University of Windsor, private and public sector partners, and all levels of government to create an environment where collaborative researchers and partners can combine their efforts in a synergistic manner to drive innovation and success. The Institute will conduct novel and innovative imaging research that can be commercialized through technology transfer initiatives that include the private sector and the development of spin-off companies.

The Institute will provide a common space and specialized project-oriented infrastructure resources that researchers can share so as to enhance their innovation productivity. The Institute will work proactively to attract new research and innovation funding for new projects while growing the membership of the Institute. There will be opportunities for the University to benefit from the commercialization of intellectual property and to develop highly qualified personnel (HQP) with professional maturity in areas that can diversify the region’s economy.

The Institute’s area of focus encompasses the development of a variety of imaging technologies and application areas such as, diagnostic, research, quality control and security applications. Funding has been provided in the amount of \$5,000,000 from the Province of Ontario Ministry of Research and Innovation to establish the Institute and carry out three initial imaging projects that will use acoustical energy to acquire the images. The initial three projects funded by the Ministry will lead to: (a) new high-value non-destructive testing systems for many industrial applications including quality assurance; (b) new high-value non-intrusive imaging systems for medical diagnostics; and (c) new high-value biometric imaging systems for identification and security applications.

The establishment of an Institute as opposed to a Centre is mandated by the Province of Ontario Ministry of Research and Innovation to ensure that the higher standards of governance required of an Institute are complied with. The Institute reports to the Vice-President, Research.

Proposal to Establish a University of Windsor Institute

(a) Name of Proposed Institute

University of Windsor Institute for Diagnostic Imaging Research

(b) Primary Objectives of the Proposed Institute for the First Five Years.

The primary objectives of the Institute for the first five years are:

1. Carry out specific research and innovation projects in the Institute's area of focus that will deliver new high-value products in relevant sectors that can be readily commercialized in the global economy.
2. Create collaborative partnerships in the local region, in Canada and internationally that will maximize the Institute's effectiveness and leverage strategic investments.
3. Promote a rapid exchange of knowledge between the Institute and private sector partners in a manner that protects intellectual property and supports commercialization.
4. Act as an incubator for establishing new spin-off companies in the area of advanced diagnostic and testing imaging techniques.
5. Diversify the region's economic sectors and increase the general competitiveness of the area's manufacturing sector.
6. Attract new research and innovation funding for new projects while growing the membership of the Institute.
7. Foster the development and teaching of new multidisciplinary courses by Institute members in their home faculties at both undergraduate and graduate levels that are complimentary to the Institute's research and innovation activities.
8. Provide the opportunity for internships as part of providing new learning and growth opportunities for students.
9. Aid Institute members in providing high quality supervision and mentoring for the graduate students involved with the Institute.
10. Produce highly qualified and skilled persons with enhanced professional maturity in the area of diagnostic imaging systems and the associated core-enabling areas of technology.

(c) Names, positions, and *curricula vitae* of members of the proposed Institute, together with a statement describing the nature and extent of their proposed participation in the new Institute.

Funding in the amount of \$5,000,000 was announced January 7, 2008, by John Wilkinson, the Ontario Minister of Research and Innovation, to establish a new Institute for Diagnostic Imaging Research at the University of Windsor. Membership in the Institute is contingent on the research and innovation projects approved by the Institute and can not be determined in advance of the establishment of the Institute. The research and innovation efforts of the Institute are carried out within the framework of projects that have been approved by the Vice-President, Research on the recommendation of the Director of the Institute. All Institute members will be associated with an Institute project. Membership in the Institute will consist of the Principal Investigator for each Institute project together with faculty members and other qualified persons working on an Institute project as approved by the project's Principal Investigator and the Director of the Institute.

Once the Institute has been established, outstanding candidates working in the Institute's areas of focus will be invited to become Institute members by developing a new Institute project and acting as Principal Investigators, or join as members working on one or more of the three inaugural research and innovation projects funded (\$4,850,000) by the Province of Ontario Ministry of Research and Innovation.

(d) Procedure for selection of the membership in the Institute and Institute Council.

Vice-President, Research

Membership in the Institute is based on whether the candidate is carrying out research and innovation within the framework of an Institute project approved by the Vice-President, Research on the recommendation of the Director of the Institute.

Membership on the Institute's Advisory Council is determined in accordance with the governance structure of the Institute. The Institute's governance, management and operation are accountable to the Vice-President, Research. The Vice-President, Research is responsible for ensuring that an effective governance and management structure is in place for the Institute that is in compliance with stakeholder requirements.

Board of Directors

A seven (7) person Board of Directors will be responsible for the oversight and monitoring of the management of the Institute and its research and innovation projects. The Board of Directors will receive comprehensive reports on the conduct of the research and innovation projects, monitor performance metrics, ensure compliance with funding agency and University requirements, and provide guidance and advice. The following are the members of the Board of Directors: (a) the Vice-President, Research of the University of Windsor or delegate; (b) The Director of the Institute; and (c) Five external directors with the requisite skills and experience. The Vice-President, Research is responsible for approving the membership of the Board of Directors which will carry out the required oversight and monitoring of the Institute. The Chair of the Board of Directors will be appointed by the Vice-President, Research for a term of three years, renewable.

Advisory Council

An Institute Advisory Council will also be constituted to represent stakeholders within the University and external community and will include some of the Institute's high-profile members. The role of the Advisory Council is to provide input and advice to the Director and Principal Investigators on: strategic directions, partnerships, commercialization and sources of funding. Members of the Advisory Council will be appointed by the Board of Directors on the recommendation of the Director and will serve for a one year term, renewable as determined by the Board. The Advisory Council does not have operational or fiduciary responsibilities.

(e) Name, present position, and *curriculum vitae* of the proposed Director.

1. Director of the Institute

The Director of the Institute leads the management team and provides the general operational and strategic oversight of the Institute. The Director reports to the Vice-President, Research. In addition to his responsibilities as Principal Investigator for the projects, Dr. Roman Maev will serve as the Founding Director of the Institute for a special term of 5 years from start-up to enable the Institute to be fully established and functioning. The directorship will be reviewed by the Board of Directors at the end of five years and, upon majority approval, will continue for five additional years. Following the end of second five-year term, the directorship may be renewed annually based on majority approval. If the directorship is not renewed, an election will be held by the Board to recommend a Director to the Vice-President, Research for a three-year term, renewable.

The Director of the Institute functions as the Chief Executive Officer and is the Chair of the Management team. The Director of the Institute is responsible for providing general leadership regarding the strategic direction of the Institute, for managing the achievement of Institute goals and objectives, for finding new opportunities for research, innovation projects and funding, for facilitating research programs, for enacting the plans of the Management Team, and for coordinating Project planning and resource allocation and the daily operation of the Institute.

An Associate Director may be appointed, based on an appointment process established by the Board of Directors.

PERSONAL INFORMATION

Place of Birth: Moscow, Russia
Date of Birth: May 23, 1945
Citizenship: Canadian
Languages: English, Russian (spoken and written)

EDUCATION

<u>Degree</u>	<u>Institution</u>	<u>Thesis Field</u>	<u>Year</u>
Full Professor in Physics	Russian Federation Government Diploma	<i>Scientific Equipment and Methods for Experimental Physics</i>	2005
Dr. Sc.	Russian Academy of Sciences	<i>Methods of Acoustic Microscopy for Investigation of Microstructure, Physical and Chemical Properties of Materials</i>	2002
Ph.D.	Physical P.N. Lebedev Institute of the USSR Academy of Sciences	<i>Theory of Photo-Semiconductor Physics</i>	1973
Post-Graduate Student	Moscow Physical Technical University, Russia.	<i>Semiconductors and Acoustoptics</i>	1969-72
M.Sc. Combined with B.Sc.	Moscow Physical Engineering Institute, Russia	<i>Theoretical Solid State and Nuclear Physics</i>	1969
Undergrad Student	Moscow Institute of Radioelectronics, Russia		1962-63

APPOINTMENTS AND PROFESSIONAL POSITIONS

<u>Institution</u>	<u>Position</u>	<u>Year</u>
University of Windsor, Windsor, Ontario, Canada Faculty of Science	University Professor.	2006-present
University of Windsor, Windsor, Ontario, Canada Department of Electrical Engineering	Full Faculty Professor – Cross Appointment.	2006-present
University of Windsor, Windsor, Ontario, Canada Department of Physics	Chair holder, NSERC/DaimlerChrysler/University of Windsor Industrial Research Chair in Applied Solid State Physics and Material Characterization.	2002-present
University of Windsor, Windsor, Ontario, Canada Department of Physics	Director, DaimlerChrysler Canada/University of Windsor Centre for Imaging Research and Advanced Materials Characterization.	1997-present
University of Windsor, Windsor, Ontario, Canada Department of Physics	Full Faculty Professor with Tenure, Head, Ultrasonic Research Laboratory.	1996-present

Russian Academy of Sciences, Moscow, Russia	Director, International Advanced Material Study Centre.	1987/97
Institute of Chemical Physics of the USSR Academy of Sciences	Head of the Laboratory of Biophysical Introscopy.	1984-87
Moscow Technical University, Russia	Deputy Chief of the Chair, Associate Professor of Applied Physics and Biophysics.	1984
Moscow Physical Technical University, Russia	Deputy-Chief of the Chair, Assistant at Moscow Physical Technical University.	1978-84
National Scientific and Research Institute for Physical-Technical and Radio-technical Measurements	Researcher.	1974-78
Physical Lebedev Institute of the USSR Academy of Sciences	Researcher.	1969-73

ADDITIONAL EDUCATION AND PROFESSIONAL EXPERIENCE

2007-present	Member, IEEE Administrative Committee.
2006-present	Member, Board of Directors “The Ontario BioCar Initiative”
2005-present	Associate Editor, Journal IEEE Transactions on Ultrasound, Ferroelectrics and Frequency Control.
2004-present	Member, Quality Control Chapter of USCAR Organization
2004-present	Member of Editorial Board, Journal of the American Society for Nondestructive Testing “Research in Nondestructive Evaluation”.
2001-present	Adjunct Professor, CNDE Johns Hopkins University, Baltimore, Maryland, USA.
1995-present	Member and Scientific Consultant, Advanced Working Group, Canada-Russia Intergovernmental Economic Commission.
1999-02	Adjunct Professor, Material Department, Dental School, University of Michigan, Ann Arbor, Michigan, USA.
1996-99	Adjunct Professor, Department of Electrical Engineering, McGill University, Montreal, Quebec, Canada.
1995-99	Adjunct Professor, Department of Industrial and Manufacturing Systems Engineering and Department of Physics, University of Windsor, Windsor, Ontario, Canada.
1992-94	Scientific Consultant, Technological Non-Profit Marketing Venture Project “Hi-Tech from Russia”, Supported by Siemens AG and Daimler-Benz, AG Germany, together with the Russian Academy of Sciences, Moscow, Russia.
1994-95	Visiting Professor, Ultrasonic Microscopy Lab, University of Windsor, Windsor, Ontario, Canada.
1993	Guest Researcher, National Institute of Standards and Technology, United States Department of Commerce, Washington, D.C., USA (3 mo.).
1992, '93, '96	Visiting Professor, Hafei University, Hafei, Republic of China (2 mo. each).
1991	Visiting Professor, Institute of Experimental Physics, Frieie Universitaet, Berlin, Germany (3 mo.).
1990	Visiting Professor, Institute of Physics, Federal Air Force, University of Munich, Germany (3 mo.).
1989	Visiting Professor, Department of Electronics, Kyoto University, Kyoto and Tohoku University, Sendai, Japan (3 mo.).
1988, '91	Visiting Professor, Department of Material Sciences, Oxford University, Oxford, United Kingdom (3 mo. each).

MEMBERSHIPS, PROFESSIONAL ORGANIZATIONS

2006-present	Member, American Society for Nondestructive Testing (ASNT) National Research Council.
2005-present	Member, Brockhouse Institute for Materials Research at McMaster University.
2004-present	Member, Quality Control Panel of USCAR.
2001-2005	Chairman, Division of Industrial and Applied Physics, Canadian Association of Physicists.
2001-2004	Panel Member, Ontario Graduate Scholarship (OGS).
2001-2004	Member, Imaging Expert Group, Canadian Foundation Innovation.
2001-present	Senior Member, American Society for Nondestructive Testing.
1999-present	Member, Program Committee for Acoustical Imaging Symposium.
1998-present	Member, Technical Program Committee (TPC) for IEEE Ultrasonics Symposium.
1998-present	Full Member, Acoustical Society of America.
1996-present	Member, Canadian Association of Physicists.
1995-present	Senior Member, IEEE.
1994-present	Member, Canadian Acoustical Association.
1991-present	Member, Non-Ionization Radiation International Expert Group of the World Health Organization (WHO).
1991-present	Member, Acoustical Society of Russia.
1982-present	Member, Scientific Council, Russian Academy of Sciences on the Problem of Acoustics.
2004	Panel Chair, Ontario Graduate Scholarship (OGS).

- 2003-04 **Member**, Program Committee and Chair of two Sessions of the World Congress in NDT, July 2004, Montreal, Quebec, Canada.
- 2001 **Chairman**, 26th International Acoustical Imaging Symposium, September 2000, Windsor, Ontario, Canada.
- 2000-01 **Vice-Chair**, Division of Industrial and Applied Physics, Canadian Association of Physicists.
- 2000 **Chairman**, Symposium on Physical Sciences and Advanced Vehicle Technologies, June 2000, Toronto, Ontario, Canada.
- 1999-01 **Councilor**, Ontario-Southwest, Council of Canadian Association of Physicists.
- 1988-92 **Member**, Scientific Council of the USSR Academy of Sciences on the Problem of the High-Temperature Superconductive Materials.
- 1985-94 **Member**, Organization Committee of Few West Germany - Soviet Union Bilateral Scientific Seminars.
- 1974-84 **Member**, Program Committee and Organization Secretary All-National Soviet Union Regular Scientific School "Actual Problems of Physics".
- 1988-98 **Chief**, Commission of Young Scientists in National Russian Chemical Society.
- 1980-96 **Member**, United Nations (UN) Commission on the Problem: "Man and the Biosphere".
- 1974-84 **Member**, Central Council of the Young Scientist Society of the USSR.

MEMBERSHIPS, UNIVERSITY OF WINDSOR

- 2006-present **Member**, Department of Physics – Promotion, Tenure and Review Committee
- 2005-present **Member**, Curriculum Committee
- 2005-present **Member**, Machine Shop Committee
- 2005-present **Member**, Graduate Advisory Committee
- 2003-present **Member**, University of Windsor Graduate Faculty Council
- 2003-present **Member**, Graduate Council Executive Committee
- 2004-06 **Member**, University of Windsor Senate
- 2004-06 **Member**, Program Development Senate Committee
- 2001-05 **Member**, Liaison Research Council and Research Advisory Council
- 1997-02 **Member**, Executive Committee for the School of Physical Sciences

1993/95	RosShelf Program. Grant in Development of NDE Systems & Methods for Evaluation of Materials and Constructions Reliability in Oil and Gas Industry.
1993/94	All Russian Foundation for Fundamental Investigations. Grant in Micro-Mechanical Study of High-Anisotropic Materials.
1993/94	Ministry of Sciences, Higher Education and Technology Policy of Russia. Grant in Ultrasound Micro-Defectoscopy in Micro-Mechanics.

1991/92	USSR State Committee for Science and Technology. Grant in Acousto-Microscopy for Material Science.	
1988/91	USSR Academy of Sciences. Grant in Material Microstructure.	
1984/87	USSR State Committee for Science and Technology. Grant in Acousto-Microscopy.	
1984/86	USSR Academy of Sciences. Grant in Ultrasound Biological Application.	
1983/85	USSR State Committee for Science and Technology. Grant in Acousto-Optics.	
1980/83	USSR State Committee for Science and Technology. Grant in Biomedical Research.	
	Canadian	
2007/11	Ontario Research Fund. "The Ontario BioCar Initiative".	\$750,000
2006/11	Natural Science and Engineering Research Council Canada (NSERC) – Collaborative Research Grant. "Radial Injection Gas Dynamic Spray Technology for Advanced Coatings".	\$1,160,000
2006/07	Research Contract with Superior Cam Inc. "Die Rebuild Process by Radial Injection Gas Dynamic Spraying (RIGDS)".	\$88,000
2006	Internal University of Windsor Grant. "Canada South Science City Displays".	\$5,081
2004/05	Research Contract with Mercedes Benz. "Adhesive Bond Analyzer".	\$268,000
2004	Research Contract with National Research Council Canada. "Identification of Key Variables for Gas Dynamic Spray Forming (GDSF)".	\$24,700
2003/05	Natural Science and Engineering Research Council Canada (NSERC) – Collaborative Research Grant. "Ultrasonic In-Process Monitoring and Feedback of Spot Weld Quality. Second Phase".	\$422,000
2003/04	Research Contract with Centerline (Windsor) Limited. "Supersonically Induced Spray Technology. Feasibility Study".	\$147,000
2002/07	Natural Science and Engineering Research Council Canada (NSERC) – Industrial Research Chair. "Applied Solid State Physics and Material Characterization".	\$2,767,300
2001	Research Contract with Mercedes Benz. "Developing a Method for Ultrasonic Imaging of Adhesive Joints within BIW – Application".	\$120,750
2000/02	Natural Science and Engineering Research Council Canada (NSERC) – Collaborative Research Grant. "Short Pulse 3D Scanning Acoustic Microscope for Manufacturing Quality Control".	\$832,000
2000/02	Material and Manufacturing Ontario – Enabling Grant. "Nonlinear Acoustic Spectroscopy (NAS): As a New Approach to Material Characterization and Component Quality Assessment".	\$167,077
2000	Canadian Foundation Innovation / Province of Ontario. – Equipment Grant. "Bimolecular Characterization and Dynamics Research Facility".	\$2,085,344 (\$298,950–R. Maev portion)
1999/01	Natural Science and Engineering Research Council Canada (NSERC) – Collaborative Research Grant. "Ultrasonic In-Process Monitoring and Feedback of Spot Weld Quality".	\$215,800
1998/00	Material and Manufacturing Ontario - Collaborative Research Project. "Laser-Acoustic Shape Measurement System for High Speed 3D Form Surface Mapping".	\$135,400
1996/00	Natural Science and Engineering Research Council Canada (NSERC) – Collaborative Research Grant. "Acoustic-Microscopy-Based Procedures and Devices for Rapid Detection of Micro-Defects in Weld Metal Joints".	\$1,391,360

I. Books

- 13 **R.Gr. Maev** and V. Leshchynsky, E. Strumban, *Portable, low pressure cold spray systems for industrial applications*, **Chapter of the book**: The cold spray materials deposition process: Fundamentals and applications, V K Champagne, Woodhead Publishing Limited, Cambridge, England, 2007.
- 12 **R.Gr. Maev**. Scanning Acoustic Microscopy. Theory and Applications, Manuscript. Publisher: John Willey and Son - VCH, approx. 450, 2007 (Submitted).
- 11 **R.Gr. Maev** (guest editor). Special Issue on High Resolution Ultrasonic Imaging in Industry, Materials and Biomaterials Applications. IEEE Transaction on Ultrasonics, Ferroelectrics and Frequency Control, 54 (8): August 2007.
- 10 **R.Gr. Maev**, V. Leshchynsky. Introduction to Low Pressure Gas Dynamic Spray, Physics & Technology, Manuscript. Publisher: John Willey and Son - VCH, Weinheim, 264, 2007 (In-press).
- 9 **R.Gr. Maev**. Acoustic Microscopy. Manuscript, Publishing House "Science" Moscow, 384., 2005.

(f) Estimated space requirements for the first five-year period.

Many of the Institute's projects will be carried out in the research facilities already available to the Principal Investigator of the project in question. The City of Windsor has agreed to be a stakeholder in the proposed Institute and make available approximately 7,000 ft² of high-value space, for a minimum of three years to provide a transitional space for the Institute, with the opportunity for renewal. The space requirements are project-specific and depend upon a number of factors and hence are not individually estimated here.

It is envisaged that the physical space directly associated with the Institute would ultimately be 36,000 ft². This space could be found through a new building initiative, one that has already been proposed for future construction in downtown Windsor.

Alternatively, the Dean of Engineering has expressed an interest in having the Institute’s facilities located in the new engineering building planned for the campus as it will complement the innovation initiatives proposed by the Faculty of Engineering.

Some Institute projects will be located in the facilities of the projects’ collaborative partner(s) and will not require any dedicated space from the University.

(g) Detailed list of existing capital equipment and other facilities which may be made available to the Institute.

It is not envisaged that existing capital equipment and other University facilities will be used extensively by the proposed Institute. The nature of the rapidly evolving technologies that will be used in Institute projects requires that new and emerging equipment will be acquired on a project by project basis. The Institute has no dedicated existing physical space. Currently projects are being carried out in the research facilities already available to the Principal Investigator of the project in question. Space for the Institute, both transitional and permanent, is discussed in the preceding section.

(h) List of projected equipment acquisitions for the first five-year period.

The research and innovation efforts of the Institute are carried out within the framework of externally funded projects. The budgets for these projects allows for the purchase of any required equipment. As the equipment acquisitions are project-specific they can not generally be listed in advance of the projects being approved by the Institute. The three inaugural research and innovation projects to be carried out by the Institute have allocated the following funds to acquire equipment:

- Project 1. (Industrial Project) Equipment Acquisition: \$424,271
- Project 2. (Biometric Project) Equipment Acquisition: \$424,271
- Project 3. (Medical Project) Equipment Acquisition: \$82,119

For a total of **\$930,661.00**

(i) Projected utilization of other University facilities and resources.

The Institute is a distributed research consortium that provides a coherent research and commercialization initiative, with the necessary critical mass and stimulating environment for its members as they work primarily in their current distributed research facilities. The Institute will provide a common space and specialized project-based resources that researchers working in the Institute’s areas of focus have the potential to share so as to enhance their innovation productivity. As each Institute project will be fully funded from external sources it is not expected that there will be any undue utilization of University facilities and resources.

(j) Projected staff requirements including research associates, postdoctoral fellows, technical and support staff, graduate students, etc., as appropriate to the Institute.

The staff requirements for the Institute and the three inaugural projects are given in the following table. The research associates, postdoctoral fellows, technical, support staff are primarily associated with a specific Institute project and are funded from that project.

Institute Staff
Development Officer (1/2) Institute Manager Support Secretary
Project 1
Project Manager (1/2) Support Secretary Innovation Staff (5) HQP (\$90K) *
Project 2

Project Manager (1/2) Support Secretary Innovation Staff (5) HQP (\$90K) *
Project 3
Project Manager (1/2) Development Officer (1/2) Innovation Staff (2) HQP (\$90K) *

* Each of the three inaugural projects have funding to support research associates, postdoctoral fellows, technical and support staff, graduate students, *etc.*, as appropriate to the specific Institute project. An amount of \$270,000.00 has been allocated among the three projects for the development of highly qualified personnel (HQP). It is envisaged that the support of graduate and undergraduate students who are not classified as innovation staff would come from this amount.

(k) Identified sources and prospects for funding of the new Institute by outside agencies.

The funding for the proposed Institute is outlined in the following three (3) sections:

(a) Funding that has already been committed (Institute Operation and Project Funding: \$7,000,000)

INSTITUTE OPERATING FUNDING			
Funding Agency	Amount	Period	
Ministry of Research and Innovation ¹	\$150,000	Over 3 years	
Chrysler Corporation ²	\$1,000,000	Over 5 years	
University of Windsor	\$1,000,000	Over 5 years	
Subtotal	\$2,150,000		
INSTITUTE PROJECT FUNDING			
Funding Agency	Amount	Period	Project
Ministry of Research and Innovation ¹	\$1,940,000	Over 3 years	1. Industrial Project
Ministry of Research and Innovation ¹	\$1,940,000	Over 3 years	2. Biometric Project
Ministry of Research and Innovation ¹	\$970,000	Over 3 years	3. Medical Project
Subtotal	\$4,850,000		
TOTAL	\$7,000,000		
Notes:			
1. MRI will transfer a total of \$5,000,000 to the University of Windsor on June 30, 2008. These funds are for an initial 3 year period.			
2. The Chrysler Corporation will assess its five year commitment on an annual basis.			

(b) Recently initiated projects (total value of \$7,889,782)

A number of research initiatives to attract funding to the proposed Institute have already been started and they are compiled as follows:

<u>Years</u>	<u>Funding Source, Support Type and Title of Proposal</u>	<u>P.I.</u>	<u>Amount</u>
2008-2012	NSERC – Industrial Research Chair with Chrysler and University of Windsor – Renewal (Applied for) <i>“Applied Solid State Physics and Material Characterization”</i> .	R. Maev	\$3,833,782
2008-2009	Ontario Centres of Excellence – Champions of Innovation Grant <i>“Nanotechnology Based Solid Lubricant Tread Patterning made using Innovative Gas Dynamic Spray Technology for Fabrication of Oil-Free Sliding Components for Automotive Applications”</i>	R. Maev	\$162,000
2007-2011	Ontario Research Fund (consortium with 4 Universities) <i>“The Ontario BioCar Initiative”</i>	R. Maev Collaborators	\$686,250 (R Maev portion)
2006-2011	NSERC – Collaborative Research and Development Grant with Centerline Windsor Ltd. <i>“Radial Injection Gas Dynamic Spray Technology for Advanced Coatings”</i>	R. Maev	\$3,207,750
Total Funding for these Projects			\$7,889,782

(c) Future Proposed projects (total value of \$6,300,000)

Based on current R&D activity and recent initiatives it is expected that the new Institute projects during the next 2-4 years will also involve the following collaborative partners and projects worth a total of \$6,300,000 as follows:

Industrial Diagnostics Area: (total estimated value \$2,800,000)

Chrysler - ultrasonic real-time quality characterization of aluminum welding processes (estimated 2 year project with a budget of about \$400,000).

Magna International - laser welding process control and weld quality assurance (estimated 3 year project with a budget of about \$500,000).

Bombardier - resistance spot welding of dissimilar metals using cold sprayed transition layers (estimated 2 year project with a budget of about \$400,000).

DARPA (USA) - joining dissimilar specific metals and metal alloys using cold sprayed transition layers with on-line welding quality assurance controlled (estimated 3 year project with a budget of about \$1,500,000).

Biometrics Diagnostics Area: (total estimated value \$1,200,000)

National Law Enforcement and Corrections Technology Center of the National Institute of Justice (USA) - high resolution ultrasonic method and portable device for 3D fingerprint representation in biometrics

Canadian Federal Agencies and Private Sector - high resolution ultrasonic method and portable device for 3D fingerprint representation in biometrics.

(These two biometric projects are estimated to be a 2 year project with a combined budget of about \$1,200,000).

Medical Diagnostics Area: (total estimated value \$2,300,000)

Institute for Biodiagnostics (NRC) - to develop a combined system for multifunctional dental diagnostics, based on laser and ultrasonic diagnostic procedures (estimated 2 year project with a budget of about \$400,000).

Institute for Biodiagnostics (NRC) - to develop a combined system for multifunctional diagnostics of internal organs, based on MRI and ultrasonic diagnostic procedures (estimated 2 year project with a budget of about \$500,000).

National Institutes of Health (USA) - to develop new technical solutions to rapid initial diagnosis of internal organs (e.g. kidneys, liver, etc.) (estimated 3 year project with a budget of about \$600,000).

Office of Naval Research (USA) - to develop a portable pulmonary injury diagnostic device and test method (estimated 2 year project with a budget of about \$800,000).

The amount of Institute funding as set out in the preceding sections (a), (b) and (c) totals:

INSTITUTE FUNDING	AMOUNT
Committed by funding source	\$7,000,000
In Progress (under negotiation)	\$7,889,782
Future (next 2-4 years)	\$6,300,000
TOTAL	\$21,189,782

(I) Budget properly constructed to show income and expenditures, with details for the first year, and projections over a five-year period. (Committed Funding Only)

The Institute budget (less facility costs) shown in the following table includes the three initial funding sources: the Ontario Ministry of Research and Innovation, the Chrysler Corporation, and the University of Windsor.

INSTITUTE BUDGET	SOURCE	Year 1	Year 2	Year 3	Year 4	Year 5
New Projects Development	MRI	\$10,000	\$10,000	\$10,000	\$0	\$0
Development Officer (1/2)	MRI	\$40,000	\$40,000	\$40,000		
Subtotals:	\$150,000	\$50,000	\$50,000	\$50,000	\$0	\$0
Institute Infrastructure	CHRYSLER	\$50,000	\$50,000	\$50,000	\$50,000	\$50,000
Attract New Projects	CHRYSLER	\$150,000	\$150,000	\$150,000	\$150,000	\$150,000
Subtotals:	\$1,000,000	\$200,000	\$200,000	\$200,000	\$200,000	\$200,000
Institute Manager (S&B)	UofW	\$120,000	\$123,600	\$127,308	\$131,127	\$135,061
Support Secretary (S&B)	UofW	\$55,000	\$56,350	\$57,741	\$59,173	\$60,648
Supplies	UofW	\$5,000	\$3,050	\$1,951	\$1,700	\$791
Communications and Reports	UofW	\$5,000	\$5,000	\$2,000	\$2,000	\$1,000
Travel	UofW	\$15,000	\$12,000	\$6,000	\$6,000	\$2,500
Subtotals:	\$1,000,000	\$200,000	\$200,000	\$200,000	\$200,000	\$200,000
TOTALS	\$2,150,000	\$450,000	\$450,000	\$450,000	\$400,000	\$400,000

NOTES:

1. MRI funding will be used to provide support for new projects development and a Development Officer who will focus on generating new projects for the Institute.
2. The Chrysler Corporation finalizes their contributions on a year-by-year basis and the continuing expected amounts are shown for years 2 to 5 in the five year budget.

The Ontario Ministry of Research and Innovation has initially funded three Institute projects. These amounts are in addition to the budget of \$2,150,000 for the operation of the Institute. The Institute will ensure the successful realization of three different projects that will utilize new common core enabling research that will support new high-resolution acoustical imaging technology and will lead to proof-of-concept-demonstrations in three distinct and uncorrelated areas suitable for global commercialization. The amounts allocated to the individual projects are: Industrial \$1,940,000; Biometrics \$1,940,000; and, Medical Diagnostics \$970,000 (Total project funding is \$4,850,000). The three initial projects budgets are summarized in the following tables.

Project 1. Budget (Industrial Project)

Item	Year 1	Year 2	Year 3	Totals
Project Manager (S&B) (1/2)	\$60,000	\$61,200	\$62,436	\$183,636
Support Secretary (S&B)	\$50,000	\$51,200	\$52,137	\$153,337
Innovation Staff (5)	\$250,000	\$259,000	\$268,270	\$777,270
Consulting Services	\$35,000	\$35,000	\$18,000	\$88,000
Equipment/Components	\$150,000	\$150,000	\$124,271	\$424,271
Supplies	\$12,000	\$11,486	\$10,000	\$33,486
Communications and Reports	\$15,000	\$15,000	\$15,000	\$45,000
Travel	\$25,000	\$25,000	\$25,000	\$75,000
Proof-of-Concept Demonstration	\$0	\$20,000	\$50,000	\$70,000
HQP Development	\$30,000	\$30,000	\$30,000	\$90,000
Totals:	\$627,000	\$637,886	\$675,114	\$1,940,000

Project 2. Budget (Biometric Project)

Item	Year 1	Year 2	Year 3	Totals
Project Manager (S&B) (1/2)	\$60,000	\$61,200	\$62,436	\$183,636
Support Secretary (S&B)	\$50,000	\$51,200	\$52,137	\$153,337
Innovation Staff (5)	\$250,000	\$259,000	\$268,270	\$777,270
Consulting Services	\$45,000	\$45,000	\$18,000	\$88,000
Equipment/Components	\$140,000	\$140,000	\$124,271	\$424,271
Supplies	\$12,000	\$11,486	\$10,000	\$33,486
Communications and Reports	\$15,000	\$15,000	\$15,000	\$45,000
Travel	\$25,000	\$25,000	\$25,000	\$75,000
Proof-of-Concept Demonstration	\$0	\$30,000	\$40,000	\$70,000
HQP Development	\$30,000	\$30,000	\$30,000	\$90,000
Totals:	\$627,000	\$647,886	\$665,114	\$1,940,000

Project 3. Budget (Medical Project)

Item	Year 1	Year 2	Year 3	Totals
Project Manager (S&B) (1/2)	\$60,000	\$61,200	\$62,436	\$183,636
Develop. Officer (S&B)(1/2)	\$40,000	\$41,200	\$42,137	\$123,337
Innovation Staff (2-with IBD NRC)	\$120,000	\$123,600	\$127,308	\$370,908
Equipment/Components	\$40,000	\$20,000	\$22,119	\$82,119
Supplies	\$10,000	\$10,000	\$5,000	\$25,000
Communications and Reports	\$5,000	\$5,000	\$5,000	\$15,000
Travel	\$10,000	\$10,000	\$10,000	\$30,000
Proof-of-Concept Demonstration	\$0	\$0	\$50,000	\$50,000
HQP Development	\$30,000	\$30,000	\$30,000	\$90,000
Totals:	\$315,000	\$301,000	\$354,000	\$970,000

SUMMARY

Institute Operating Funding	\$2,150,000
Institute Project Funding	\$4,850,000
TOTAL	\$7,000,000

The Steering committee of the 56-man Senate committee on Constitution Review inaugurated a fortnight ago by Senate President, Dr. Ahmad Lawan, is to hold its inaugural meeting today. The eight-man committee consisting of principal officers, headed by the Deputy Senate President, Senator Ovie Omo-Agege who also doubles as chairman of the larger committee, is to fashion out a working document for the main committee to work with.
